### Introduction

The Career Education curriculum contributes to students' development as educated citizens through the achievement of the following goals. Students are expected to:

- recognize the need to be adaptable, resilient, and flexible in order to meet the ever-changing opportunities and challenges of today's world
- understand how ongoing purposeful career-life development contributes to the success and well-being of individuals, communities, and society
- build personal career-life development capacity to effectively learn and grow new interests, knowledge, skills, and competencies throughout their lives
- develop awareness of their personal strengths, competencies, values, and passions, and use this self-knowledge to inform career-life choices
- communicate and interact collaboratively with others, valuing diversity of people, perspectives, worldviews, ideas, and opportunities
- explore a range of experiences, roles, and opportunities in personal, educational, and workplace contexts to advance their personal career-life journeys

Career-Life Connections focuses on applying personal career-life management knowledge, skills, and strategies to the one's own personal life journey.

This course involves online lessons, career exploration (30 hours minimum) and a final capstone project.

Regular meetings will be held for CLC students to ensure timelines and explain the Capstone project.
